

Getting Your New Song Into Spotify

Follow these steps after you download a song. It only takes a minute.

GOOD NEWS

You only have to do this **ONE TIME**. After that, every new song you download will show up in Spotify by itself!

- 1**  **Download your song**
It will save to your iPhone.
- 2**  **Open the Spotify app**
- 3**  **Tap your profile picture**
It's in the top-left corner of the screen.
- 4**  **Tap Settings and privacy**
- 5**  **Tap Apps and devices**
- 6**  **Turn on Local audio files**
Scroll down until you see it, then flip the switch so it turns green.
- 7**  **Go to Your Library → Local Files**
Look for your song! If it's there, you're all done.
- 8**  **ONLY IF YOUR SONG WASN'T THERE**
Move the song into the Spotify folder
Open the **Files** app, find your song, press and hold it, tap **Move**, and choose the folder named **Spotify**.
- 9**  **ONLY IF YOU DID STEP 8**
Turn Local audio files off, then back on
Go back to **Settings and privacy → Apps and devices**. This tells Spotify to look again.
- 10**  **LAST STEP**
Check Your Library → Local Files again
Your song will be there now!
